Review + create
By default, this assignment will only take effect on newly created resources. Existing resources can be updated via a remediation task after the policy is assigned. For deployIfNotExists policies, the remediation task will deploy the specified template. For modify policies, the remediation task will edit tags on the existing resources. Learn more about Remediation Tasks.
Create a remediation task
Policy to remediate
Configure Azure Activity logs to stream to specified Log Analytics workspace
A remediation task will be created to bring existing non-compliant resources into compliance after the assignment is created.

resources respectively. Policies that use external sources to determine enforcement outcomes need the ability to invoke these endpoints. To enable these abilities, choose between an existing user assigned managed identity or creating a system assigned managed identity. Learn more about Managed Identity.

Last Log Received
Azure Activity Log is a subscription log that provides insight into subscription-level events that occur in Azure, including events from Azure Resource Manager operational data, service health events, write operations taken on the resources in your subscription, and the status of activities performed in Azure.

Instructions
1. Disconnect your subscriptions from the legacy method
The subscriptions listed below are still using the older, legacy method. You are strongly encouraged to upgrade to the new pipeline.
To do this, click on the 'Disconnect All' button below, before proceeding to launch the Azure Policy Assignment wizard.
You don't have subscriptions using the legacy method, please move to step 2
Disconnect All
2. Connect your subscriptions through diagnostic settings new pipeline
This connector uses Azure Policy to apply a single Azure Subscription log-streaming configuration to a collection of subscriptions, defined as a scope. Follow the instructions below to create and apply a policy to all current and future subscriptions. Note, you may already have an active policy for this resource type.
Launch the Azure Policy Assignment wizard and follow the steps.
1. In the Basics tab, click the button with the three dots under Scope to select your resources
